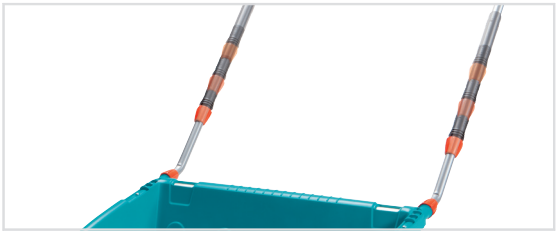
# Snow Scoop

Commercial Reference: 3260-20
Article number: 967 16 91-01
EAN: 4078500326001

NEW!

Especially in severe winters with larger areas to be cleared, the GARDENA Snow Scoop is a fast helper. With a convenient working width of 70 cm, lots of snow can be cleared at once. The handle is telescopic in three stages (approx. 30 cm) and adjustable to body height. The grip area is coated with cold-insulating material that is kind on the hands. Thanks to additional grips at approx. half the height of the handle, the collected snow can be conveniently removed. A defined tread on the rear edge of the Snow Scoop and an additional aluminium handle provide stability and allow the use of your foot when the Snow Scoop is to break even more easily into larger snow quantities. The edge is made from robust and longlife, galvanised steel.
And the best part: The Snow Scoop can be tidily stored in a jiffy when no longer needed. With just a few hand movements and without tools, the handle is removed and can be clicked under the scoop. With 25 year warranty.



INDIVIDUAL ADJUSTMENT TO BODY HEIGHT

COMPACT STORAGE

EASY REMOVAL OF SNOW

STURDY TREAD FOR GREATER EFFICIENCY

25-YEAR WARRANTY
